

Who is Solo José?

Hi! I'm a Sr. Product Designer with a background in editorial design. For over 5 years, I've collaborated with multidisciplinary teams to build user-centered mobile apps and SaaS products—mostly in fintech, e-commerce, and risk management. I love digging into user research, iterative prototyping, and using data to craft intuitive, seamless interfaces that solve real problems. Big fan of making complex tools feel effortless (and fun!). Let's build something awesome together!
